Authorisation of Prices for the Supply of LPG in Fiji

First Quarter 2015

Date Issue: 14 January 2015

© Fiji Commerce Commission

"To promote Competition in the Fijian Markets"

1.0 Introduction

- 1.1 The Fiji Commerce Commission ("Commission") completed the market investigation into the Liquefied Petroleum Gas ("LPG") in June 2012.
- 1.2 The findings of the investigation satisfied the Commission that the goods (LPG) are supplied in a market in which competition is limited or is likely to be lessened; and it is necessary or desirable for the prices of those goods or services to be controlled in the interests of users, consumers or suppliers.
- 1.3 On 12 July 2012, the Attorney-General, Minister for Justice, Anti-Corruption, Public Enterprise, Communications, Civil Aviation, Tourism, International Trade, Industry and Trade issued the Commerce (Control of Prices for the Supply of LPG in Fiji) Order 2012 ("Order") after considering the recommendation from the Commission and being satisfied that the declaration met the requirements under Section 39 of the Commerce Commission Decree 2010 ("Decree").
- 1.4 As a consequence of the Order published in the Gazette on 12 July, 2012, the Supply of LPG in Fiji became subject to Section 41 (1) of the Decree, which prohibits the supply of controlled goods or services unless a price for those goods or services has been authorized by the Commission and the goods and services supplied are in accordance with the authorization.
- 1.5 Following the declaratory order from the Minister, the Commission obtained the submission from the LPG companies and fixed and declared the Maximum Wholesale Prices ("MRP") and the Maximum Retail Prices ("MRP") beginning from 4 August, 2012. The Commission continues to retain its pricing structure for the quarterly price restatement.
- 1.6 The Commission conducts quarterly price reviews to determine the market wholesale and retail prices of LPG supplies in Fiji.
- 1.7 The 'quarterly restatements' of prices are based on three (3) months weighted average of international benchmark, Saudi Aramco Contract Price, the average exchange rate and international freight and handling charges.
- 1.8 The price of LPG was last reviewed on 18 December 2014 and was effective from 20 December, 2014. The 2014 fourth quarter second review price assessment to determine the wholesale and retail prices of LPG was based on average, Saudi Aramco Contract Price, the average exchange rate and international freight and handling charges for the months of October, November and mid-December 2014. The 2014 fourth quarter, second price review was based on the trigger effect.
- 1.9 The 2015 first quarter, review is based on the based on three (3) months weighted average of international benchmark, Saudi Aramco Contract Price, the average exchange rate and international freight and handling charges for the months of October, November and December 2014.

2.0 Legal Framework

2.1 The Commerce (Control of Prices for the Supply of LPG in Fiji) Order 2012 empowers the Commission to control the prices for the supply of LPG in all quantities, qualities, grades and classes in Fiji.

2.2 The request for information and data for the purpose of the fourth quarter 2014 LPG price review was made pursuant to Section 119 of the Decree.

3.0 Last Price Review

3.1 The last price review of Prices for the Supply of LPG in Fiji was conducted by the Commission on 20 December 2014 termed as second review for fourth quarter 2014. The prices were reviewed based on the trigger effect and a major decrease in the international prices for butane.

3.2 The prices were announced on 19 December 2014 and became effective from 20 December 2014.

3.3 Prices for the fourth quarter 2014 (second review) were based on International Published Prices for butane for the Month of October, November and December 2014. The fourth quarter 2014 second review resulted in the overall decrease in price of Auto Gas, 4.5kg cylinder, 12kg cylinder and Bulk Gas.

4.0 The Process and Commission's Analysis

4.1 The Commission through a letter dated 19 September, 2012 notified the gas companies about the submission requirements of the Commission for the quarterly review of LPG prices and the deadlines for the various processes that will be undertaken before the price review is completed and announced.

4.2 For the quarterly review, the LPG Companies are required to furnish the following information by the 5th day of the beginning of the new quarter:

- Purchase Orders;
- Commercial Invoices (Split of FOB, Insurance and Freight) including purchases and any other costs incurred;
- Bill of Lading;
- Customs entry;
- Suppliers' statements;
- Payments details, .i.e. cheque or TT forms; and
- Surveyor report.

4.3 The Commission requested for LPG submission from the two (2) LPG companies – Petroleum and Gas Company (Fiji) Limited, hereafter referred to as Blue Gas and Fiji Gas Limited.

4.4 The prices determined for the various LPG market is based on the principle of the lowest price operator to determine the single market price.

4.5 The following were observed based on the analysis of the submissions received from the two LPG companies for previous quarter and the Commission's independent research and computations:

Table 1: World Market Movement

Year	Month	Butane (USD)	Comments
2014	October	765	Saudi Aramco has set contract prices for October at \$735/mt for propane and Butane CP at \$765/mt.
	November	600	Saudi Aramco has set contract prices for November at \$610/mt for propane and Butane CP at \$600/mt. The price of Butane decreased by \$165/mt.
	December	570	Saudi Aramco has set contract prices for December at \$550/mt for propane and Butane CP at 570/mt. The price of Butane decreased by \$30/mt. The decrease in CP was due to decrease in the price of crude oil.

4.6 For the purpose of this determination the Commission has allowed the same level of mark-up on each of the three relevant products as in the previous determination. The allowable mark-ups are as follows:

- Cylinder LPG - 10% at wholesale level and 8% at retail level
- Bulk sales of LPG- 10% at wholesale level
- Autogas LPG - 10% at wholesale level and 7% at retail level

5.0 International Price Trend

5.1 The two local gas companies import bulk LPG from Australian sources. It is thus crucial to understand the price movements of LPG in Australia and Saudi CP as a symmetrical movement in domestic gas prices should also be noted.

7.0 Commission’s Authorisation

7.1 Based on the current pricing practices by the two companies, the pricing structure for Vanua Levu and Viti Levu is same, whereas the Outer Island Prices are priced slightly high to account for freight costs. Also, the cost structure for transportation of LPG to Taveuni from Vanua Levu is considered and included as a separate schedule.

7.2 The prices set out in schedule 1, schedule 2, and schedule 3 herein shall be the maximum retail and wholesale prices, as the case may be, at which the goods mentioned therein may be sold in the area so specified in the schedule. Furthermore, where the maximum price of an item listed in the schedules is required to be rounded up by reason of cessations of one (1) cent and two

(2) cent denominations, the consequential increase in the price of that item does not constitute a contravention of this determination.

7.3 Where specified quantities in Schedules 1, 2 and 3 are not available or a new quantity is introduced in the market, proportionate prices MUST be applied to all other quantities.

7.4 For Bulk Gas, the prices have been set as Ex-Factory prices and the suppliers can add a reasonable (market determined) freight and delivery charges.

7.5 For Home Delivery of 12 Kg Cylinder Gas, the Gas Companies can add an additional \$5.00 on the MRP.
